

Nusantara Token (\$NUSA) is a cryptocurrency that runs on the Tron network (TRC20) with a total supply of 1,000,000 and has been listed on several popular crypto exchanges including JustSwap, OneSwap, CCTip and others.

NUSA is entirely created with the aim of being a token swap & as a community token that can also be traded on crypto exchanges. NUSA is not a digital asset that represents a real project (asset digitization), it's just a token swap!

The background of the creation of NUSA is that we want to create a token swap with an iconic Indonesian name that will be a common pride for all Indonesian crypto lovers. The name Nusantara itself is taken from the term used to describe the archipelago stretching from Sumatra to Papua, which is now largely part of the Indonesian state. For Indonesians and the Asean region, of course, they are familiar with the name Nusantara.

Nusantara consists of the word nusa which means island, namely islands, and between which means other or opposite.

The use of the name Nusantara for our tokens is none other than to invite Indonesian crypto lovers and traders to unite and want to collect and trade tokens made by the nation's children, named NUSA. The crypto community in Indonesia itself is very large in number and actively trades on various existing crypto exchanges. We hope that with an iconic name, NUSA will later become a token of the crypto community that will be proud of because of a sense of nationalism, a strong sense of belonging so it is not just a matter of price or ranking on a high crypto exchange index, so someone will buy & hold NUSA. because of "a sense of pride".

And here are the technical details about Nusantara Token (NUSA)

- Name: Nusantara Token
- Symbol: NUSA
- Blockchain: Tron
- Type: TRC20
- Decimal: 6
- Total Supply: 1,000,000
- Current Circulation: $\geq 20,000$
- Smart Contract: TRAJJ5GuGBR3QpH7EGTNVfx43jXNk5arc9

NUSA Is a Cryptocurrency

In addition to trading, NUSA as a blockchain-based crypto currency can of course be used for online payments / transactions such as tokens / coins that are already popular, for example Doge, TRX, Bitcoin and others where previously there was an agreement between the two parties to use NUSA in their transactions. .

And it is not impossible in the future if NUSA has a large enough audience, we will create our own DAPP, an example of an online store where NUSA can be used as the main digital currency for buying and selling at the online shop.

NUSA For Crypto Trading

As mentioned above, NUSA was created with the aim of being limited to Token Swap! You can use NUSA for Trading or Add Liquidity at JustSwap, CCTip Swap and others. We strongly encourage crypto traders and crypto lovers to have NUSA as a mainstay digital asset to take advantage of NUSA price fluctuations on the exchange.

NUSA is made using smart contract technology that runs on the Tron network chain which is known to be faster, safer and cheaper in transaction fees than other blockchains. In addition, the Tron ecosystem which continues to grow rapidly is a promising thing that TRC20 Tokens have more good prospects in the future.

We realize that the current crypto project competition is quite tough and we realize that our little project will be difficult to compete on the crypto exchange. However, we are still optimistic that NUSA will have a special place among crypto lovers. Our marketing methodology and strategy must be creative with “out the box” ideas so that here we will not say exaggerated things about NUSA, we will not say anything great that is just nonsense but here we assure you that we are serious and passionate with the NUSA project !!

The NUSA Ecosystem

1. Trading

Currently, NUSA can be traded on quite popular crypto exchanges including [OneSwap](#) , [JustSwap](#) , [CCTip Swap](#)

2. Storage

NUSA is a TRON token, all dapps and crypto wallets support the TRON protocol so that NUSA can also be stored receive / send. You can use popular crypto wallets like [Tronlink](#) , [TrustWallet](#) and others to store, receive and send NUSA quickly and securely.

3. Explore

You can explore any information related to NUSA via block explorer to find information such as supply, price charts, user transaction data and statistics on [Tronscan](#) , [Coinranking](#) , [Blockspot](#) and others.

ALLOCATION

The total supply of NUSA is 1 million tokens and currently there is circulation of 20,000 tokens or 100% of NUSA's circulation target in the first quarter or 2% of the circulation target in 2021.

The following is the distribution scheme for NUSA's 100 thousand supply in 2021:

- 20% (20,000 nusa) will be circulated in the first quarter by way of distribution through pre-sales, supplying NUSA to justswap, oneswap and cctip exchanges as well as for bounty programs on social media.
- 10% (10,000 nusa) will be distributed by way of open sale, for promotional activities and event procurement in the 2nd quarter.
- 30% (30,000 Nusa) will be distributed in the 3rd quarter to increase the liquidity supply for Nusa Tenggara on the exchange and for open sales to get additional funds for developing Nusa Tenggara projects as well as additional costs for the plan to list Nusa Tenggara on the market.
- 50% (50,000 nusa) will be distributed in the fourth quarter to supply homeland to the market where in the fourth quarter our target is that we have Nusa to list in the crypto market.

The remaining supply of 900,000 NUSA (90%) will be locked for one year and will be used / distributed gradually from the Issuer wallet for future project and business development plans.

Issuer Wallet to lock the remaining balance of NUSA is:

ROADMAP 2021

Q1

Introducing NUSA to all crypto lovers, listing NUSA on justswap, circulating 10,000 NUSA by way of pre-sale, giveaway, airdrop and building the NUSA community on social media.

Q2

Build a website as part of a standalone ecosystem plan for NUSA. Conducted 10,000 NUSA open sales and published Whitepaper-v1.

Q3

Listed NUSA on popular crypto markets such as Poloniex Dex, Vindax and Latoken and reached a circulation of 100,000 NUSA.

Q4

Starting to build DAPP as part of NUSA's big plan in the future, namely having an independent ecosystem and becoming a global ranking 100 token.

Why Buy & Hold NUSA?

Of course everyone has their own reasons & judgments why they buy / not buy or even hold a digital asset (cryptocurrency). Some make it an investment, some buy for profit from trading on exchanges and other reasons.

Here are 9 reasons why we encourage you to buy NUSA & hold onto it:

1. NUSA was made with a small total supply. In economics, a trade product is increasingly scarce, the more expensive the price is, for example Bitcoin.
2. NUSA has been listed on JustSwap, justswap itself is a crypto exchange specialized for the trc20 protocol which is very popular at this time.
3. There is a guarantee of buy back if the price of NUSA dump exceeds 0.6 TRX / 1 NUSA. So the price of NUSA will be stable in the price range of 1 TRX or more.
4. NUSA is a trc20 token (tron blockchain) that is in demand by many people because of its cheap transaction fees, speed and the TRON ecosystem which has continued to grow rapidly in recent years. Many people believe the Tron blockchain will be able to compete with Ethereum.
5. NUSA is a new token for now which is still in the introductory stage so the price is still very cheap, you can even have 1000 NUSA for only 1000 TRX.
6. The price of NUSA continues to increase every second on the exchange. Even though the purpose was made only as a token swap but seeing that the demand is great and the price continues to increase, NUSA is also suitable for short-term and long-term investments.
7. NUSA is a long-term project that will continue to be developed. In time, it is not impossible that NUSA will become a well-known token like YFI, Dot and others.
8. NUSA is made by experienced blockchain developers and only managed independently by our team.
9. Circulation is still controlled and guaranteed price intervention if NUSA's price falls below -1 TRX / 1 NUSA, we will repurchase it so you will not lose if you buy NUSA today and sell it at a later date.

DEVELOPMENT TEAM

Nusantara Token is a fully independent project, all technical processes, financing in this project does not involve any party and is fully carried out & authorized by us without interference from any party.

CAUTION

Crypto trading is a high risk activity. Crypto prices are very volatile, price changes up / down can occur very quickly. It's best to think carefully before deciding to buy or sell Crypto.

Here we do not force anyone to buy or sell NUSA as an investment or for the purpose of seeking profit from trading. All decisions to buy / not be up to you.
